Education

VIT-AP University <i>B.Tech in Computer Science and Engineering - CGPA: 9.13</i>	<i>Sep 2022 – May 2026</i>
Krishna Chaitanya Junior College <i>Intermediate (12th) MPC - Percentage: 85.6</i>	<i>June 2020 – Apr 2022</i>
Roshini Ratnam EM High School <i>10th Standard - Percentage: 97.6</i>	<i>Jun 2019 – Apr 2020</i>

Projects

Cardio Vascular Disease Analysis and Prediction ◦ Developed deep learning models using custom CNN and pre-trained VGG16 architectures for cardiovascular disease prediction from ECG images, optimized through GridSearchCV for improved accuracy. ◦ Deep Learning Models: CNN, VGG16	GitHub ↗
BookMyTrack ◦ Developed an inclusive and user-friendly railway reservation system enhancing accessibility, gender options, group/family booking, and intelligent lower berth allocation for elderly passengers. ◦ Web Technologies: HTML, CSS, Javascript, Node.js, Express.js, MongoDB	GitHub ↗
Tic Tac Toe Game ◦ Built a console-based Java Tic-Tac-Toe game using the Builder Design Pattern and SOLID principles to ensure modular design, reusability, and easy maintenance. ◦ Tools: Java, Low-Level Design	GitHub ↗

Technical Skills

Languages: Java, SQL
Frontend: HTML5, CSS3, JavaScript
Frameworks: React.js, Bootstrap
Databases: MySQL, MongoDB
Tools: Git, GitHub, Postman

Certifications

- AWS Certified Cloud Practitioner [Link](#) [↗](#)

Publications

Beyond Daylight: Impact of Satellite Inclination on Solar Panel Performance in Space-Based Power Systems - IEEE Xplore	Link ↗
◦ Presented advanced techniques for real-time sensor data analysis and regression modeling to optimize solar energy capture and voltage management in space-based power systems.	

Extracurriculars

Marketing Member - Innovators Quest Club	<i>Oct 2023 – May 2024</i>
V-Guide Member - Computer Society Of India (CSI)	<i>Aug 2024 – May 2025</i>

Achievements

- Presented "Hand Gesture-based Controlled Car" project at VIKAS Expo

Work Experience

Software Development Intern

Jun 2025 – Aug 2025

A-Innovations

- Developed responsive web application features using React.js, JavaScript, and REST APIs.
- Used Git and GitHub for version control and collaborated on reusable software components.
- Tested API functionality with Postman and helped identify and resolve application issues.
